3. A fire can break out with little or no warning. The more prepared you are, the safer you will be. Smoke detectors should be located on every floor of your home and near all places that you and your family sleep. Smoke detector batteries should be changed on a regular basis.
4. A fire can break out with little or no warning. The more prepared you are, the safer you will be. Have a meeting location at school and at home that everyone will gather after a fire evacuation. A meeting location will help you quickly verify that everyone made it out safely.
5. A fire can break out with little or no warning. The more prepared you are, the safer you will be. Once you evacuate due to a fire, NEVER go back inside a burning building. Once out, stay out. Firefighters will rescue anyone who needs help.
